

Roof-top Water Harvesting System 1

Recharge Borewell

Bhumi Pujan for Pond Development in the presence of Chairman of Member of Legislative Assembly and Hon. Minister

As a Part of water Conservation Pond Deepening Work in University Campus

Date: 23rd October 2024

To Whomsoever it may concern

Arid Communities and Technologies (ACT) conducted extensive rainwater harvesting and groundwater recharge initiatives at Krantiguru Shyamji Krishna Verma Kachchh University (KSKVKU) from 2010 to 2011. These efforts have resulted in noticeable improvements in groundwater levels and quality across existing borewells on the campus. The rising groundwater levels and enhanced water quality highlight the positive impact of these sustainable water management practices, underscoring the effectiveness of rainwater harvesting and recharge activities in the campus.
